

**REMARKS/ARGUMENTS**

**I. Status of Claims**

Upon entry of this preliminary amendment, claims 1-7 and 9-18 are canceled without prejudice or disclaimer and new claims 19-27 are introduced. Applicants retain the right to prosecute the canceled claims in this or another application. The new claims fall within the subject matter of Group I from the restriction requirement made during prosecution of the parent application.

The new claims find support throughout the specification, including, for example, pages 18-22 and original claims 1-7.

**II. Amendments to the Specification**

The Cross-Reference to Related Application section has simply been amended to refer to the parent application.

The specification has also been amended to delete references to hyperlinks in the specification; these are not critical to the claimed invention. The specification has also been amended to conform references in the specification to the labels actually used in the figures. Text originally in the figures has also now been included in the brief description of the drawings. None of these amendments introduce new matter.

If the Examiner believes a telephone conference would expedite prosecution of this application, please telephone the undersigned at 303-571-4000.

Respectfully submitted,

Scott L. Ausenhus
